

NOTES · 1 / 28

Session of Monday 12 October, the last of six. Interviews with the firms are still running for some teams, so avoid calling anything "the interview" without saying which one. The next stop is the final assessment: the hand-in on Sunday 25 October and the final CBI on Monday 26 October.

TODAY

Four things, then you are ready for the final round

YOUR INTERVIEWS

What the firms told you

AEL

Evaluating the LLM wiki

THE FINAL ASSESSMENT

What, when, where

THE ECONOMY WE BUILD

Your postcards, then statements

NOTES · 2 / 28

Four parts. Start warm, with what the firms said. Then the AEL lecturer. Then the practical part: what goes where and when. Close with the discussion, which is the fun part and the first rehearsal for guiding question 3.

YOUR FIELD INTERVIEWS

What did the firm tell you that no source could?

Teams with an interview behind them: **two minutes** each.

One surprise · one thing you will use · one question still open

NOTES · 3 / 28

Invite the teams that have held their interview with the firm to share. Two minutes each, three prompts on the card. Teams without an interview yet: listen for what they can still ask, or use for their plan B. Keep it positive; where fieldwork is still behind, the point is what each team can still do in two weeks.

FROM INTERVIEW TO PAGE

Interview results go into your pages; the transcript into your portfolio

YOUR HANDBOOK PAGES

Weave in what you heard. Keep improving until **25 October**.

YOUR PORTFOLIO

The **transcript** of the interview.

NOTES · 4 / 28

Two consequences of the interview. The results go into the handbook pages, which teams may keep improving until the hand-in on 25 October. The transcript goes into each student's portfolio. Consent and the rules on interview material still apply: the transcript goes to HandIn, not into the public repo and not into the LLM wiki.

AEL

Compare wikis with a peer team, then build your next improvement

COMPARE

Open each other's wiki

CHOOSE

One next improvement: seen, discussed, or your own idea tested on them

BUILD

30 minutes

NOTES · 5 / 28

AEL slot: a peer review of the LLM wikis, then one improvement built. Pair the teams. Each pair opens both wikis and compares them: what they hold, how they are organised, how well they answer a question. Each team then chooses its next improvement. It can come from what they saw in the other wiki, from the conversation, or from an idea they already had and tested on the other team. Then half an hour to build it. Teams that kept a different knowledge architecture compare that instead. Remind them that the change is a decision and goes in the decision log.

THE FINAL ASSESSMENT

Two weeks to go: hand in on Sunday, the CBI on Monday

MON 12 OCT

Last session

SUN 25 OCT, 23:59

Hand in

MON 26 OCT

The final CBI

NOTES · 6 / 28

The timeline. Three dates, nothing else. The hand-in deadline is Sunday 25 October at 23:59.

THE FINAL ASSESSMENT

Each of you uploads two things to HandIn

DATA MINING

The **demo video**: five minutes, the same for the whole team. A file or a link.

Old module names, right places.

BUSINESS INTELLIGENCE

Your **portfolio**.

NOTES · 7 / 28

Two uploads on HandIn, by every student. HandIn still carries the old module names: the video goes under Data Mining, the portfolio under Business Intelligence. The video is one per team, and each member uploads the same file or a link to it. Full details: the final interview page, section "Before the interview".

THE FINAL ASSESSMENT

Your portfolio holds three things

- Your team's **four handbook pages**
- The **transcript** of your interview
- A link to your **GitHub repo**, with the video link in it

NOTES · 8 / 28

The portfolio: the team's four handbook pages, the interview transcript, and a link to the team's GitHub repository. The video does not go in the portfolio again, but the repo should link to it.

TAKEAWAY

Know your portfolio: the final CBI tests what it claims

NOTES · 9 / 28

Takeaway. Every student is questioned individually. If the portfolio says you did something, expect to be asked how.

THE FINAL CBI

Twenty minutes per team: your pitch, then our questions

5 MINUTES

Your pitch

Your time slot

15 MINUTES

Questions, to **each** of you

NOTES · 10 / 28

On 26 October: 20 minutes per team, both lecturers, in English. About five minutes of pitch, the rest is questions to each student in turn. Slots are on the final interview page; no sign-up; be there five minutes early.

THE FINAL CBI

Prepare all four questions; your pitch picks its focus

RESEARCH

From problem to advice

JUDGEMENT

How far you trust your tool

PERSPECTIVE

Your sector, your future job

GROWTH

What you can do now

The questions in full

NOTES · 11 / 28

The four guiding questions, one line each. Prepare all four. The full wording is on the final interview page.

THE FINAL ASSESSMENT

Two grades, one per module, built the same way

70 %

The final CBI

30 %

Your portfolio

The mini-CBI did not count.

NOTES · 12 / 28

Two grades, one per module. Each is 70 % final CBI and 30 % portfolio. The mini-CBI in week 4 was diagnostic and did not count.

TAKEAWAY

No late hand-in: on Monday at 09:00 we press play

NOTES · 13 / 28

Takeaway. No late hand-in is possible: the lecturers start watching the videos on Monday morning at nine.

THE ECONOMY WE BUILD

Last week: front-runners in your sector, from three regions

CHINA

Team 5 · 6 · 8

UNITED STATES

Team 1 · 2 · 4

EUROPE

Team 3 · 7

NOTES · 14 / 28

Recap of last week's in-class assignment: front-runner AI use cases in each team's sector, in one of three regions. The postcards from 2035 became homework: each team posted its postcard in its Teams channel or GitHub repo before this session.

THE ECONOMY WE BUILD

Pitch your postcard from 2035 in two minutes

What does it do? Whose AI is it? Who gains, who pays? What does it need from the country? What economy does it show?

NOTES · 15 / 28

Each team pitches its postcard and its strongest case in about two minutes, using the five questions from the assignment. Group the pitches by region so the differences show. This is the starting point of the discussion.

DISCUSSION

Our choices shape the economy, and the jobs in it

Agree or disagree? Take a side, then give one reason from your case.

NOTES · 16 / 28

From the cases to the choices: how do the choices we make now shape the economy, and the AI-powered jobs in it? Suggested format: agree on one side of the room, disagree on the other; one student per side gives a reason from their case; anyone may switch sides after hearing the other.

Ten statements follow (s17–s26). Pick the ones that fit the room; there is no need to do all ten.

AGREE OR DISAGREE?

AI will make small firms stronger against big companies.

NOTES · 17 / 28

Statement: AI will make small firms stronger against big companies.

AGREE OR DISAGREE?

Europe should accept slower AI adoption in exchange for stronger rules.

NOTES · 18 / 28

Statement: Europe should accept slower AI adoption in exchange for stronger rules.

AGREE OR DISAGREE?

By 2035, most SMEs will employ fewer people because of AI.

NOTES · 19 / 28

Statement: by 2035, most SMEs will employ fewer people because of AI.

AGREE OR DISAGREE?

Whoever owns the AI models will own the profits of the economy.

NOTES · 20 / 28

Statement: whoever owns the AI models will own the profits of the economy.

AGREE OR DISAGREE?

Depending on American or Chinese AI is fine for a Dutch SME.

NOTES · 21 / 28

Statement: depending on American or Chinese AI is fine for a Dutch SME.

AGREE OR DISAGREE?

Time saved by AI should become a shorter working week.

NOTES · 22 / 28

Statement: time saved by AI should become a shorter working week.

AGREE OR DISAGREE?

AI hits entry-level jobs first, so your first job gets harder.

NOTES · 23 / 28

Statement: AI hits entry-level jobs first, so your first job gets harder.

AGREE OR DISAGREE?

Governments, not markets, should decide where AI may replace workers.

NOTES · 24 / 28

Statement: governments, not markets, should decide where AI may replace workers.

AGREE OR DISAGREE?

An SME that does not use AI by 2030 will not survive.

NOTES · 25 / 28

Statement: an SME that does not use AI by 2030 will not survive.

AGREE OR DISAGREE?

AI makes work more human: machines take the routine, people the rest.

NOTES · 26 / 28

Statement: AI makes work more human, with machines taking the routine and people the rest.

OUR RULEBOOK

The rules we keep, week by week

RULE 1

Before taking a break, **always** set AI to work.

RULE 2

Do something **weird**.

RULE 3

Learning above results.

RULE 4

Technology is **not** the barrier.

RULE 5

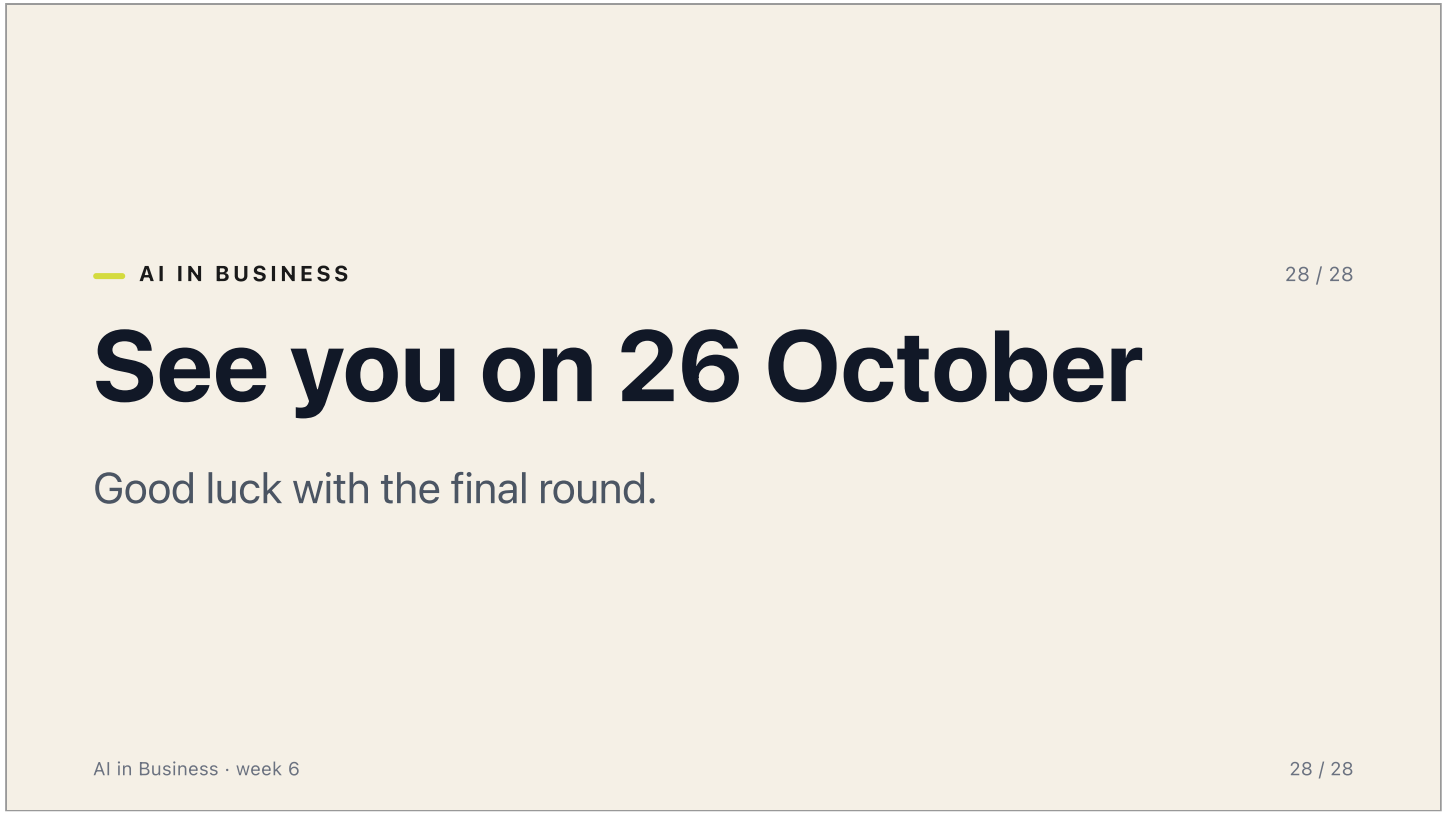

Never make **someone else's** problem yours.

RULE 6

It is **never** done.

NOTES · 27 / 28

The rulebook. Rules 1 to 3 from weeks 1 to 3; rule 4 from week 4, "Technology is not the barrier"; rule 5 from week 5, "Never make someone else's problem yours", written on the board above the four kinds of knowns and unknowns. Rule 6, "It is never done", was written together in this session.

NOTES · 28 / 28

Close. See you on 26 October.
