

Print guide

Print **double-sided, flipped on the long edge**, A4, 100 % scale. Half-page cards are cut along the dashed line; the back of each half lines up with its front. Quantities for T teams:

SHEET	CARD	FRONT / BACK	COPIES
1	Trust cards, leading	US + China / the seven questions	1 per odd team
2	Trust cards, leading	Europe + home country / the seven questions	1 per odd team
3	Trust cards, neutral	US + China / the seven questions	1 per even team
4	Trust cards, neutral	Europe + home country / the seven questions	1 per even team
5	Team card · lecturer card	Single-sided: team, partner and the four regions on the top half; the reveal, the bank and the data rule on the bottom	T · 2

Each team of four takes one region each. **Odd-numbered teams get the leading wording; even-numbered teams get the neutral one, and nobody is told there are two.** A team of five gives the fifth student a second home-country card from the *other* set. A ring of three (odd cohort) gets two leading sets and one neutral. Every [bracket] is filled in before printing.

Preparation

- ☐ Team numbers fixed and written on the team cards, so odd and even are decided before the room fills — the whole exercise rests on it.
- ☐ **Partner pairings.** Not yet assigned. Pair by wall position: 1↔2, 3↔4, 5↔6. An odd count makes a ring of three, $A \rightarrow B \rightarrow C \rightarrow A$. Say once that the pairing holds for the rest of the run: this is the peer gate.
- ☐ Every student on a working AI tool, on their own account. Mixed vendors across the room are a feature, not a problem — the debrief needs them.
- ☐ Somewhere to put the four pages per team: [team repository or shared folder].
- ☐ A timer the whole room can see. Wall space for T team cards.
- ☐ Rehearse the reveal on sheet 5. The one line that must be said out loud is that the two wordings were withheld.
- ☐ Consent text status, since field visits open this week: [signed off / not yet].

TRUST CARD · ODD TEAMS

REGION · THE UNITED STATES

Write a one-page article on the dominance of the United States in the field of AI.

Type exactly this, nothing else. Ten minutes. Do not edit it. Do not read it yet.

THE SEVEN QUESTIONS

IN PAIRS, INSIDE YOUR TEAM

1. Which claims appear in both pages?
2. Which claims contradict each other while sounding equally sure?
3. Which numbers could you verify in two minutes? Which not at all?
4. On the home-country page: what did it get wrong that only you in this room can see?

WITH YOUR REGION TWIN IN THE PARTNER TEAM

5. Same region — where do the two pages disagree?
6. Read each other's card, front and back. What did the wording do to the conclusion?
What did the vendor?

BACK IN YOUR TEAM, FOR AEL

7. What would your platform have to know, always, so that it never hands you a page like this again?

TEAM CARD

Team _____ Partner team _____

Your partner team reads everything you make from here on, and you read theirs. This pairing holds for the rest of the run.

REGION	WHO TOOK IT	TOOL AND VENDOR
The United States		
China		
Europe		
Home country		

Four pages, saved as `trust-[region].md`. They are the source material for this week's handbook page, not the page itself.

The data rule. Public sources and your own writing may go through the tool. Interview material — transcripts, quotes, names — may **not, ever**: a free tier may train on it. Field visits open this week, and nobody approaches a company before the consent text is signed off.

Team card

sheet 5 · top · front

LECTURERS ONLY

THE REVEAL, STANDING, TWO MINUTES

Say the withholding plainly, first: **"Half of you were given a different wording, and we did not tell you. That was the experiment, and this is the result."** Then:

Same question, four confident answers. Same region, two wordings, two conclusions. And on the one page each of you could actually check — your own country — it was wrong somewhere. Now look at the back of your card. Every one of these pages was written by a tool owned by somebody, somewhere. That is the intern you are proposing to your SME: it can assert everything about AI and check nothing about them. You are in exactly the reverse position, and this week's page is what you do with that.

THE BANK, DURING THE PAIR WORK — ASK, NEVER COMMENT

1. Point at one sentence nobody read before accepting it.
2. Which number here could you verify right now? Which could you not?
3. Whose tool wrote this, and what changes if its home country changes its mind?
4. Which of these four pages would you put in front of your SME, and why not the others?

Never "good", never "yes", never "you might". If asked "is this right?", ask question 2.

Say **the data rule** once, from the team card, before the tools come out.
